Air Channel Classic takes commodity floating sleeper system technology and adds a whole new dimension of resilience and uniformity. This economical suspended system features enhanced pad components for added value in a basic commodity design. The double profiled, cavity-backed, 7/16” EPDM rubber Bio-Pads offers greater durability and higher performance values than most commodity pad designs.

- Resilient EPDM Bio-Pad™ for shock absorption and vibration control
- Continuous subfloor provides uniformity & strength under bleacher loads and portable backstops
- High-Profile and economical
