Because Everyone Deserves a Safe Place to Play...

Everything you want (and need!) to know about the new PULASTIC Warranty

When choosing a Pulastic sports floor, we do not want you to simply rely on the number of years we are warranting the system; instead, rely on the facts. Robbins has installed over 50 million square feet of Pulastic in North America and never had a floor failure. Our partner Sika Corp has installed over 300 million square feet worldwide without a floor failure. Over the years we have experienced minor issues but in all cases, these were effectively corrected. These are facts, they are the backing for why Robbins is the first Sports Flooring Manufacturer in North America to offer their customer a no questions asked **25 YEAR WARRANTY**. It is not the paper we want to you to buy, it's who we were yesterday, who we are today, and who we will continue to be tomorrow, that we want you to purchase.

1 What's Covered?

Let's get straight to the point. Everything, all of it, the total package, the whole enchilada, everything AND the kitchen sink. It covers manufacturing defects, delamination of the layers, deterioration of the base mat, reversion or re-liquefying of any layer and/or separation of the seams within the base mat. AND, in the event that this does occur, it covers the materials and labor to replace it.

“Everything is covered, all of it, the total package, the whole enchilada, everything AND the kitchen sink.”

2 How do I know Robbins & Pulastic will still be around in 25 years?

Consider this, Robbins has been around for over **100 years**, certainly longer than any warranty we offer. We are a leader in our industry with no intention on being gone tomorrow. Our relationship with Pulastic is currently finishing its third decade. ALMOST 30 YEARS.

Our relationship with the inventor of padded polyurethane exceeds that of the warranty we offer.

Sika Netherlands has been manufacturing and installing polyurethane worldwide for more than 60 years with installations on all continents, and in all varieties of natural environments, by a wide sampling of people. The list of projects whose years of service exceed the typical life expectancy of competitive products grows longer every year; and there is no end in sight. Warranties are about tomorrow and not today. If the life expectancy of a sports floor is 20 years or less why would you warranty for any longer. The life expectancy of a Pulastic floor maintained properly is a lifetime. SO WHY WOULD WE NOT OFFER A WARRANTY THAT PROVIDES COMFORT AND ASSURANCE FOR A FLOOR WE KNOW WILL LAST LONGER THAN 25 YEARS?

3 Why does this warranty really matter?

Sometimes warranties are said to be “not worth the paper they are written on”, and in some cases, this statement is as true today as it was when this statement was originally made. Warranties involve integrity, honesty, commitment and value. Robbins 25 year Pulastic warranty covers **LABOR** and **MATERIALS**, which was unheard of prior to us stepping up and committing to repairing or replacing the installation if any failure occurs within the warranty period. Our warranty starts the day your materials are installed, not when they are purchased, when the project has reached completion. The day you walk on to that floor, hold a service, graduation, a basketball game, a trade show or anything you wish to do on your multipurpose floor is the day you have the assurance from Robbins that we stand behind what you purchased.

“Robbins has installed over 50 million square feet of Pulastic...”

Don't just take our word for it. Take a look at these PULASTIC floors that are still in use today & in great shape!
