

*PULASTIC JV is an **EXCEPTIONALLY** soft, yet extremely point elastic and highly shock absorbing multi-purpose surface. This system, like other Pulastic systems, contains no surface seams, which can harbor bacteria, providing a safer, more hygienic surface that's especially ideal for daycare and other facilities where young children play. Increased softness coupled with **ENHANCED** point elasticity makes it ideal for senior citizen activity areas, walk-jog tracks and wellness. These exceptional performance characteristics are accomplished through our unique JV shock pad in combination with the standard Pulastic resin.*

- Manufactured under ISO 9001, ISO 14001, and CSR Level 3 (ISO 26000)
- Good resiliency for comfort and injury prevention
- Seamless, non-porous and smooth surface for easy maintenance, repair and resurface options
- Excellent contact noise reduction for outstanding acoustic isolation
- Sustainability through high content of recycled and rapidly renewable raw materials
- Water based finish for very low odor during installation and maximum indoor clean air protection during use
- Outstanding mechanical strength and wear resistance for optimal life cycle cost and maximum usability
