

UltraShield 100™

MOISTURE PROTECTION For Your New Floor

UltraShield 100 is a rolled moisture barrier for use over concrete floors where high in-slab Relative Humidity (RH or high PH) readings are present. It is designed to suppress the upward movement of water vapor and alkalinity from the concrete slab into the finished flooring, which can cause floor failure.

UltraShield 100 is a superior underlayment that can be installed over on-grade and below-grade concrete slabs, as well as elevated precast slabs, slabs on metal decks, elevated structural concrete, and lightweight concrete.

UltraShield 100 carries a **20 Yr Warranty**, which is 10 years longer than most!

Superior Moisture Protection:

- ✓ 100% RH Protection
- ✓ Loose-Lay Installation
- ✓ Protects Against pH12
- ✓ Resistant to Mold & Fungus
- ✓ For Approved Wood & Synthetic Floor Systems
- ✓ Accepts Anchor Penetration
- ✓ No Shot Blasting Required

Technical Features:

Roll Size: 5' x 144'

Roll Weight: 99 lbs

Roll sf: 720 per roll

Application Temp: 60°-90°
